Project Reflection Report

By: ABDULAHAD KASIM SULAIMAN

Member of the Development Team

Introduction

My name is ABDULAHAD KASIM SULAIMAN, and I am part of the development team that recently worked on creating a chess game. This project has been an important learning experience, helping me develop both technical and interpersonal skills.

Teamwork and Collaboration

One of the most valuable aspects of the project was the opportunity to work with a team. I learned that collaboration requires more than simply dividing tasks—it also involves listening, adapting, and communicating effectively. Each team member brought unique strengths, and together we were able to combine our skills to move the project forward. This experience showed me the importance of cooperation and how vital teamwork is in achieving a successful outcome.

Challenges with GitHub

At the same time, the project introduced me to GitHub, a powerful version control and collaboration tool. Although it is widely used in the software industry, I personally found it challenging to use. I struggled with updating repositories, resolving conflicts, and keeping my work in sync with the team. This difficulty highlighted an area where I need to improve. While it was frustrating at times, it motivated me to dedicate more effort to learning GitHub, as I now recognize how essential it is for modern development.

Conclusion

Overall, this project strengthened my teamwork skills, revealed areas for growth, and gave me practical insights that will guide me in future projects.
